PREFACE

English has become one of the most important languages that is beneficial to master for every student who wants to compete globally and work internationally. It is also the same for nursing students. The need to understand kinds of new nursing knowledge and apply it in the field and communicate in English professionally for them seems as a must in recent years due to the demand of professional nurses to work all around the world. This book which is created by compiling from some major sources and being equipped by attractive yet easy-to-understand language is trying to help them understanding new knowledge in easy way. The advantages of this book are:

- Deep explanation about topic with an easy diction
- Giving new information structurally
- Explanation when preparing for appointment
- List of important questions: doctors, patients, nurses

Although this is an Nursing book with English Language, It is also supported yet equipped with explanation and information towards the topics discussed with simple delivery. It is hoped that readers will not only be able to undertsand the topic but also could use the language as needed while having to re-explain or re-inform to others. Then, both theory and practice as it is aimed will be obtained.

Our gratitude to all people we could not mention individually. This book is categorized to *Non-Clinical Nursing Skill. It is then named Basic Nursing in English: Respiratory Related Illness Part 1.*

Writers,

Devia and Ridhwan

TABLE OF CONTENTS

PREFACE	iii
TABLE OF CONTENTS	v
UNIT 1 RESPIRATION	1
A. Overview	2
B. Respiratory System	5
C. Types of Respiration	9
