To Know & To Treat

English has become one of the most important languages that is beneficial to master for every student who wants to compete globally and work internationally. It is also the same for nursing students. The need to understand kinds of new nursing knowledge and apply it in the field and communicate in English professionally for them seems as a must in recent years due to the demand of professional nurses to work all around the world. This book which is created by compiling from some major sources and being equipped by attractive yet easy-to-understand language is trying to help them understanding new knowledge in easy way. The advantages of this book are:

- Deep explanation about topic with an easy diction
- Giving new information structurally
- Providing with symptoms, causes, prevention, treatment

Although this is an Nursing book with English Language, It is also supported yet equipped with explanation and information towards the topics discussed with simple delivery. It is hoped that readers will not only be able to undertsand the topic but also could use the language as needed while having to re-explain or re-inform to others. Then, both theory and practice as it is aimed will be obtained.

## A. Definition

Attention-deficit/Hyperactivity Disorder (ADHD) is exhibited by not being able to focus, being overactive, not being able to control behavior, or a combination of these. For these symptoms to be diagnosed as ADHD, they must be out of the normal range for a person's age and development.

Attention-deficit/hyperactivity disorder (ADHD) is a chronic condition that affects millions of children and often continues into adulthood. ADHD includes a combination of

### A. Diagnosis

There is no one test to diagnose ADHD in children or adults. Clinicians may personally observe the patient, use questionnaires and scales that measure symptoms, conduct psychological tests, and interview or collect rating scales from the patient's relatives, teachers, or others who are in their lives. They may also use clinical testing to rule out other possible conditions.
